

## Notes for All Illinois Shippers

**\*\*UPDATED \*\* Please read carefully!**

If the sale you were on didn't do what you expected this year, don't dispare. It's just the fur market doing what it's done for centuries. It rises and falls like any other commodity market because of things most of us don't understand. What I've always done when the market drops is try to figure out a way to catch more fur the next year to make up for the difference. That way, when the market takes the next upswing it really pays off big time.

The best way to be productive is to remain positive. Better times will come for all of us.

If you are planning to bring us possums to process and sell for you please bear in mind that the charge for processing the small ones and the black ones is usually more than what they are worth. ☹️ The market wants only the big silver possums and they are usually worth more than the processing fee. Even better it would be a good opportunity for you to learn how to process them yourself and pay yourself to do it.

Those of you bringing frozen pelts to us may want to write your name and account number on each of the bags with a permanent marker along with the tage on the inside and outside of the bag. A little insurance never hurts especially when it doesn't cost you money.

Elsewhere in this packet there is specific information on current market expectations. Also there is information that may answer questions you might have.

To obtain that information you need to read through all the documents included.

One of those documents is our scheduled fur route pickups. After you've read it, please post it where you and others can refer to it. You should know that we will be in a Rental Truck and that our scheduled pickup times are based on good weather and driving conditions. While we do put an extra 15 minutes into our travel time in case of bad weather it may not be enough in some cases. Please be early at the stops, we should be too but please understand we must leave on time. If we are 30 minutes over due you should call us on our cell phone number on board is 815-238-7406 (for fur routes only). This number rarely works at our house but 815-232-8059 will.

Another of these documents are some shipping tags and some invoices. Each are pre-printed with all the necessary info. Please also include your email address! Put it on the bottom line where it says county. With that we can get important info to you about changing market conditions more timely. Also please remember all pelts that require cities tag numbers (otter, bobcats, etc) **MUST** be listed on your invoice in the space provided.

All you need to do is put the number of pelts in each bag onto the tag that you affix to that bag. Then on **one** invoice fill in the total number of all pelts you are shipping at that time. We will have extra bags, tags, and invoices along should you need them. Since we are pinched for time it is better if you have all of this done when we get there. We don't need to count your pelts, that's done at Stoughton. You can use plastic wire ties or whatever works for you to close the bags and affix the tags you filled out.

There is a place on the tag and invoice for your license number. You should fill in the number but we need to see the licenses when we pick up your fur.

If you are sending your fur with someone else to our pickup stop you must also send your license or a photocopy of it or we can't receive it. This goes for buyer's licenses also. The DNR demands that we see the license to verify it is current.

As you know there are two zones in Illinois with different opening and closing season's dates for the different species as well as different dates for hunting and trapping of several species. If you are using hunting dates for some and trapping for others you should include both numbers and have both licenses with you.

Several years ago your state trapper and hunter organizations (you should be a member) pushed for and got an additional 10 days at the end of the season for you to get your fur ready to sell, which means you now have 20 days after the close of the trapping or hunting season in the zone you are in to market your fur. We try to set our routes to coincide with those dates.

**You will notice that we now have a route in March to coincide with the last possession dates for the different species for either dry or green pelts.**

Because we usually need to fill the truck to the top to fit it all on board, we need to limit the number of *coon pelts in each bag to maximum of 50*. It's much easier to get a bag of that size up on the top than it is on one with 125-150 pelts. We have plenty of bags, if you need more just contact me we'll send them to you.

We have recently established some official end of season drop off locations around the state where you can take your DRY pelts to. They will have the necessary permits to legally receive your DRY pelts and they will bring them to me the next time I come around.

**Please understand that we cannot accept pelts that are beyond the legal date—no exceptions!!**

You should know that if you need more time to get your pelts ready you can get a buyers license for as little as \$25.00 which allows you to have the fur in your possession until approximately one month after beaver season closes. There are record-keeping requirements though. To obtain a permit contact DNR commercial licenses and permits online –

Start here! (this is very tricky to find otherwise)

<https://www.il.wildlifelicense.com/license.php?action=custlkup>

or you can now buy it at your local walmart.

**Be sure you buy it within the legal time frame for you to have fur in your possession!**

There seems to be some confusion over what the term "green fur" means. While some feel it is somewhat vague here in Illinois (while different in other states) **the term "green fur" means any pelt that has not been tanned, which** includes pelts on the carcass, skinned pelts, and fleshed and dried pelts.

***So unless it has been tanned you have to have it out of your possession within 20 days after the close of season unless you have a buyer's license.***
